

SAMCHITA PANDEY

Aspiring .NET Developer | .NET Traineeship Applicant

Kathmandu, Nepal | samchitapandey54@gmail.com | +977-9748260894 | github.com/Sammchita | linkedin.com/in/samchita-pandey

PROFILE

Final-year BSc. CSIT student with hands-on, project-based experience in C#, ASP.NET Core MVC, Entity Framework Core, and SQL Server, gained by independently building three role-based, database-driven applications end to end. Eager to deepen this foundation through structured mentorship as a .NET Trainee at Bajra Technologies. A dependable team player and active technical-community organizer with a consistent record of self-directed learning, clear communication, and follow-through on commitments.

TECHNICAL SKILLS

Backend / .NET: C#, ASP.NET Core MVC, Entity Framework Core, ASP.NET Core Identity, LINQ, REST APIs

Database: Microsoft SQL Server, MySQL, relational database design, EF Core Code First & Migrations

Frontend: HTML5, CSS3, Bootstrap, JavaScript, Razor Views

Other Languages: Java, Python, PHP

Tools: Visual Studio, VS Code, Git, GitHub, SSMS, Postman

Concepts: OOP, MVC Architecture, CRUD, Authentication & Authorization, RBAC, SDLC, Data Structures & Algorithms

.NET PROJECTS

Hospital Appointment Management System | *ASP.NET Core MVC | C# | EF Core | SQL Server | Identity*

- Built a role-based system for Patients, Doctors, Receptionists, and Admins with appointment booking, scheduling, and status workflows.
- Implemented doctor consultation and prescription workflows covering diagnosis, medicines, dosage, and instructions.
- Set up authentication and role-based authorization with ASP.NET Core Identity, plus relational entity mappings and EF Core migrations.

Expense Tracker | *ASP.NET Core MVC | C# | EF Core | SQL Server*

- Developed a database-driven personal finance app with authentication, CRUD-based financial records, dashboards, and reporting.
- Applied MVC architecture, dependency injection, LINQ, and server-side validation with SQL Server integration.

Leave Management System | *ASP.NET Core MVC | C# | Database*

- Developed an ASP.NET Core MVC application that enables employees to submit leave requests and track approval status.
- Implemented role-based authentication and authorization allowing administrators to review, approve, or reject leave

RELEVANT EXPERIENCE

Web Development Intern — CodSoft *August 2026*

- Completing a hands-on web development internship, applying core development and problem-solving skills in a structured, deadline-driven setting.

Software Fellowship — MERN Stack (4-Day Intensive) — Industry-led Program *August 2025*

- Built a full-stack application under mentorship, gaining practical exposure to REST APIs, component-based UI development, and backend integration.

Executive Member — The Algorithm — Student Tech Community *December 2025 – Present*

- Co-organize technical workshops and learning sessions on programming and software development for fellow students.
- Coordinate with a peer team on planning, communication, and delivery of community-led technical events.

EDUCATION

Bachelor of Computer Science and Information Technology (BSc. CSIT) — Tribhuvan University, Nepal *2022 – 2026*

Relevant Coursework: Web Technology, Database Management Systems, Data Structures & Algorithms, System Analysis & Design, Programming Fundamentals

ADDITIONAL

- Strong problem-solving mindset — comfortable breaking down and reasoning through unfamiliar technical problems independently.

- Clear communicator who asks questions readily and works closely with teammates, developed through community organizing and fellowship work.
- Able to commit fully to a structured, full-time program schedule and follow through on mentorship feedback.
